Personal information

A fresh junior developer and a postgraduate at the University of Tasmania with a focus on Information technology and Information system. I have experience as a website developer when I studied in UTAS and doing my internship in Hobart local organisation (Asian hand and MMG). I am familiar with multiple front-end programming languages, including Html, CSS, and Javascript, and also good at responsiveness website development.

I am also a person who is willing to learn the latest IT knowledge and enjoy the challenge of software development and problem-solving both individually and collaboratively.

I have studied and lived in Hobart for about 4 years and enjoy life here. In last December, I have got my PR (permanent residence visa) and plan to stay in Hobart for another long term period.

Education history & Skills

UTAS (University of Tasmania) 6.07 of 7 GPA

Professional skills

Software: Microsoft suite of products (Word, PPT, Excel, Visio, Project), Sublime, Webstorm, PHPstorm

Language: Html, CSS (Bootstrap, Sass), Javascript (Jquery), PHP, R, Python

Support techniques: Google API, Wamp, Craft Cms, AWS EC2, Linux

Database: Oracle database, Mysql database, Maria database, Mysql workbench

Current Drivers License

Hobbies

I am a fan of Soccer and cycling. The great passion and changeable strategies are the things that attract me most.

In my spare time, I will also take an eye on the latest IT knowledge learning. After my graduation, I spend my private time on learning Bootstraps, Mysql database set up, Jquery and other Js framework, which is useful for responsiveness website development and also support me a lot when I doing my internship program.

Volunteer activities

- 2018 Australia International Student Festival (AISF)
- 2018 Bunnings BBQ for Winter Appeal (Hobart City Mission)
